WORK EXPERIENCE

TERRAVISION GAMES

Senior AI Programmer

Bogotá D.C, Colombia

Jan. 2025 - Present

At Terravision Games, I currently work as a Senior AI Programmer, focusing on the design and implementation of advanced gameplay systems and AI behaviors. My role involves:

- Prototyping and developing AI decision-making systems (behavior trees, services, tasks, and custom algorithms) to create believable and dynamic character behaviors.
- Collaborating with designers and gameplay programmers to ensure AI integrates seamlessly into core mechanics and enhances the player's experience.
- Advanced knowledge in Gameplay Ability System (GAS) for game features including a custom version of the system.
- Driving performance optimization of AI and gameplay systems, including network replication improvements and latency management and performance with trace analysis
- Mentoring and supporting teammates by sharing best practices in Unreal Engine and C++ and making code reviews, ensuring robust and maintainable codebases.
- Contributing to the release of Orcs Must Die by the Blade, where I explore complex challenges in character AI and gameplay interaction for Meta Oculus 2 and 3.

Senior Gameplay Programmer

Jan. 2024 - Jan. 2025

- Development of game mechanics and systems using Unreal Engine 4 and 5 using blueprints and C++
- Implementation of optimization tools and improvements to replication and latency management to deliver a smoother player experience
- Contributing to the release of Killer Klowns from Outer Space: The Game for PS5, Xbox Series and PC
- Development of gameplay mechanics for multiplayer VR games
- Implementation of AI algorithms, including the use of behavior trees, tasks, and services

Unreal Gameplay Programmer

Jul. 2021 - Jan. 2024

- Created mechanics for videogames using Unreal Engine and C++
- Created audio, gameplay and multiplayer systems implementations for PC and console games.

- Made audio and music implementations using FMOD and Unreal Engine
- Created Unreal Engine plugins (for multiplayer games) and tools
- Usage of Gameplay Ability System (GAS)
- Basic Knowledge of Artificial Intelligence for Unreal Engine and multiplayer games

GAMES

ORCS MUST DIE: BY THE BLADE

2026

TERAVISION GAMES, ROBOT ENTERTAINMENT - META

Meta Oculus 2 & 3

KILLER KLOWNS FROM OUTER SPACE: THE GAME

2024

TERAVISION GAMES, ILLFONIC

Xbox Series, Play Station, PC

EXTRA CURRICULAR ACTIVITIES

PERSONAL GAMES PROJECTS

2019 - Present

As a personal project I am studying Game Development by myself and making games. You can see my portfolio on GitHub.

UNREAL ENGINE ANGELSCRIPT

2026

Started exploring angelscript as plugin to develop faster prototypes and games, for this, I'm creating a mechanics-copy like of Sega Dreamcast games

SKILLS

- **Programming languages:** C++ - Javascript - C#
- **Game engines:** Unreal Engine 4 / 5 - Unity
- **Plugins and other systems:** Gameplay ability system, Multiplayer, Networking, Blueprints, FMOD, AI (Unreal Engine), Angelscript
- **Tools:** Unreal Game Sync, Perforce, Git, Jira

I'm a Senior AI Programmer with a focus on Unreal Engine and C++, specialized in gameplay systems and artificial intelligence for video games. Throughout my career, I have worked on titles such as Killer Klowns from Outer Space: The Game, where I developed AI systems, multiplayer mechanics, optimization tools, and multiple features aimed at enhancing the player experience. I'm currently working on Orcs Must Die By The Blade, where I continue to expand my experience with complex gameplay systems and have had the opportunity to keep growing as an AI programmer, bringing multiple characters to life. What truly drives me is the challenge of creating mechanics that surprise players, offering them possibilities that don't exist in the real world or in other games, and solving the technical challenges that come with it.

My professional goal is to keep growing in the industry, leveraging my expertise in AI and gameplay to build innovative, dynamic games that leave a real impact on players.
